

# 2026 World Cup — N8X Sportsbook Performance Report

Cross-functional Operations Review · incl. By-Site analysis

Period: 2026-06-12 ~ 07-16 (GMT+8)

Currency: USD

Matches Kickoff: 102 / 104

Providers: 4

Data: snapshot 0716

**Bottom line.** N8X (three sites combined) over the first 102 matches: **Turnover ~\$15.10M, GGR ~\$831K**, blended **Margin 5.50%** — flat (from 5.50%). Three company-wide signals: (1) revenue is **>90% concentrated in the single provider SABA** (GGR share 92%); (2) **daily Margin is highly volatile** (see Daily Trend) — never conclude from a single day; (3) the real peak, **the knockout stage, is underway** (currently 98% of the schedule). Among the sites, **Bwing Margin is lowest (4.73%)**, but its odds/risk settings are identical to the others — this is customer behavior and variance.

## 1. Executive Summary — Key Metrics

TURNOVER (HANDLE)

**\$15,095,926**

avg/match \$147,999

GGR

**\$830,873**

avg/match \$8,146

MARGIN %

**5.50%**

GGR÷Turnover

BET COUNT

**494,315**

total bets

- 102 / 104 matches (98%)** completed; house profitable in **61 matches** (60%).
- Latest trading day (**07/16, 1 match(es)**): **1.8%** of cumulative GGR (\$15,250), Margin **5.93%** on the day, **2.3%** of cumulative bet count (11,145 bets).
- Blended Margin 5.50% sits at the low end of the normal sportsbook range (industry typical 5–8%).
- Avg Turnover/match ~\$148K; house profitable in 61/102 matches (60%).

## 2. Daily Trend — Match Performance by Day (since the 6/12 kickoff, GMT+8)

Basis: Platform = all providers and all sites combined; each row aggregates every match settled that day. Read the platform total first, then the per-provider Margin% matrix, then the per-provider / per-site amount tables (K = thousand USD; green = house win, red = house loss).

### A. Platform Total

| Date  | Matches | Turnover | GGR     | Margin % |
|-------|---------|----------|---------|----------|
| 06/12 | 2       | 254,895  | 124     | 0.05%    |
| 06/13 | 2       | 267,140  | -34,268 | -12.83%  |
| 06/14 | 4       | 505,471  | 82,911  | 16.40%   |
| 06/15 | 4       | 410,423  | -29,441 | -7.17%   |
| 06/16 | 4       | 487,163  | 137,663 | 28.26%   |
| 06/17 | 4       | 529,006  | -70,766 | -13.38%  |
| 06/18 | 4       | 525,663  | -8,737  | -1.66%   |
| 06/19 | 4       | 495,989  | 73,665  | 14.85%   |
| 06/20 | 4       | 561,700  | 32,792  | 5.84%    |
| 06/21 | 4       | 616,030  | 7,639   | 1.24%    |
| 06/22 | 4       | 537,794  | 52,665  | 9.79%    |
| 06/23 | 4       | 621,682  | -9,144  | -1.47%   |
| 06/24 | 4       | 557,387  | 8,958   | 1.61%    |

| Date              | Matches    | Turnover          | GGR            | Margin %     |
|-------------------|------------|-------------------|----------------|--------------|
| 06/25             | 6          | 523,388           | 43,373         | 8.29%        |
| 06/26             | 6          | 529,878           | 49,297         | 9.30%        |

## D2. Match-by-Match Detail — each match's share of platform / each site's TO, GGR, own Margin

① "N8X Overall" is the 3-site combined total's share of N8X's cumulative platform total; "Nova88 / Goal123 / Bwing" are each site's own share of that site's own cumulative total — the four tables use independent bases.

② Match Margin% = this match's own GGR ÷ TO (its win/loss efficiency) — a different concept from the share columns, do not conflate the two.

③ Stage is taken from the source data's match stage (Group A–L / Round of 32 / Round of 16 / Quarter-final / Semi-final / Final / 3rd Place); knockout stages are flagged with a red badge.

④ Matches are aligned across sheets by match number (NO); N8X main sheet and the three site tabs have been verified consistent.

### N8X Overall (3 sites combined)

| Date/Time (GMT+8) | Stage   | Match                              | Turnover | GGR     | % of Platform TO | % of Platform GGR | Match Margin% |
|-------------------|---------|------------------------------------|----------|---------|------------------|-------------------|---------------|

#### Terms in plain language:

- **Turnover** = total amount players wagered. Shows how big the business is, not profit.
- **GGR** = what the house actually keeps after paying out winners.
- **Margin** =  $GGR \div Turnover$ . For every 100 staked, how much the house keeps — how efficiently it wins.
- **CUM. (cumulative)** = everything added up from kickoff to now, not just a single day.
- **TO Share** = this provider's wagers as a % of the whole platform.
- **GGR Share** = this provider's revenue as a % of the whole platform.

### 3. Provider Performance — provider structure

| Provider | Turnover   | TO Share | GGR     | GGR Share | Margin % | Bet Count |
|----------|------------|----------|---------|-----------|----------|-----------|
| SABA     | 12,949,026 | 85.8%    | 764,739 | 92.0%     | 5.91%    | 390,645   |
| BTI      | 1,700,084  | 11.3%    | 35,136  | 4.2%      | 2.07%    | 89,442    |
| SBO      | 281,912    | 1.9%     | 36,500  | 4.4%      | 12.95%   | 9,451     |
| IM       | 164,904    | 1.1%     | -5,502  | -0.7%     | -3.34%   | 4,777     |

Provider Mix — Turnover share GGR share

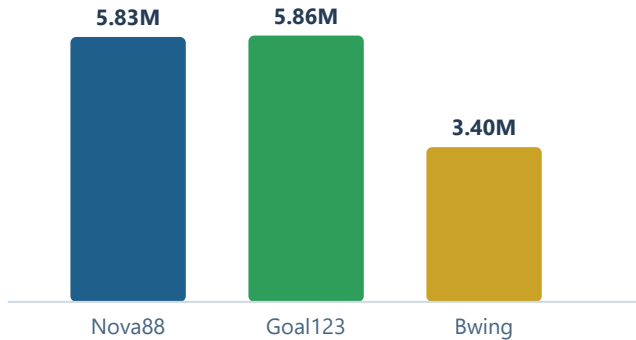

SABA carries the whole platform (Turnover 85.8% / GGR 92.0%) — single-point dependency is now extreme. SBO is only 1.9% of volume yet has the highest Margin 13.0% — an efficient candidate to scale.

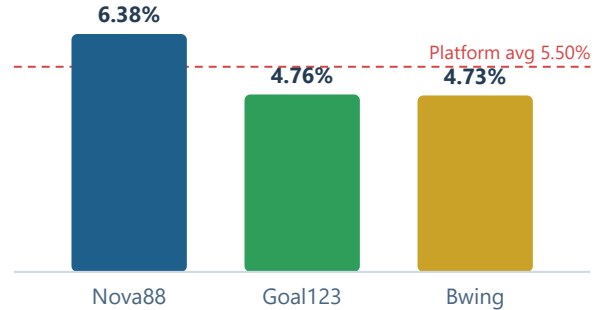

#### 4. By Site — deep dive (Nova88 / Goal123 / Bwing)

Site Comparison — three sites (left: volume Turnover right: win efficiency Margin %)

Turnover (USD)

Margin % (efficiency)

**How to read this chart:** it compares the three sites on two things — **left: who has the volume** (Turnover, total wagers) and **right: who wins efficiently** (Margin). The red dashed line on the right is the platform-average Margin. **A site that is "tall on the left, short on the right" has high volume but poor efficiency — effort for little return.**

**Finding:** site Margins are **Nova88 6.38%** 、 **Goal123 4.76%** 、 **Bwing 4.73%** (volume: Goal123 > Nova88 > Bwing). **All three sites share identical odds and risk settings**, so Bwing being lower is not a settings issue — it is **differences in customer betting behavior** (player mix / hit rate) and **sample variance**. Differences across sites reflect customer behavior and sample variance; keep monitoring.

★ **Note (SBO / IM):** in the per-site provider tables below, **SBO and IM show 0**, meaning **that site had no bets on those two providers this period** (a genuine 0, not missing data). SBO / IM volume on N8X is small overall and not every site carries them; see Section 3 Provider Performance for the platform-level SBO / IM totals.

| Provider | Turnover  | TO Share | GGR     | Margin % | Bet Count |
|----------|-----------|----------|---------|----------|-----------|
| SABA     | 2,710,513 | 79.6%    | 126,042 | 4.65%    | 86,298    |
| BTI      | 455,289   | 13.4%    | 20,428  | 4.49%    | 19,827    |
| SBO      | 134,492   | 4.0%     | 23,566  | 17.52%   | 5,024     |
| IM       | 104,252   | 3.1%     | -9,134  | -8.76%   | 2,154     |

▲ **Top wins:** France v Spain (07/15 03:00) (+33,776) 、 Spain v Cape Verde (06/16 00:00) (+23,345) 、 Germany v Paraguay (06/30 04:30) (+14,044) | ▼ **Worst:** Tunisia v Japan (06/21 12:00) (-14,078) 、 France v Senegal (06/17 03:00) (-12,413) 、 USA v Paraguay (06/13 09:00) (-11,000)

5. Match-level Volatility

Per-match Margin % — house hold per match (Match 1 → 102)

By match order, Match 1 -> 102 (per-match Margin %)

 **How to read this chart:** each bar = one match. **Green** = house won that match, **red** = players won / house lost; the longer the bar, the bigger the win (or loss). The blue dashed line is the average.

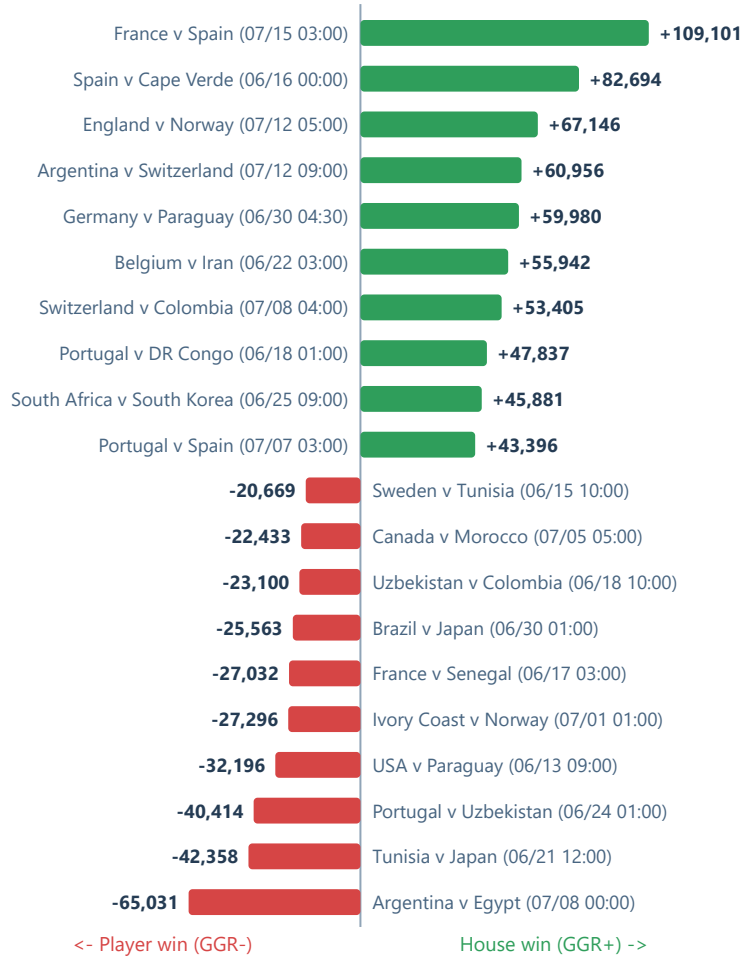

**Takeaway:** single-match results swing wildly (nobody controls who wins a football match) — big wins and big losses, ranging from **-29% (worst)** to **+53% (best)**. So to judge whether the house is winning, **always look at the cumulative figure, never a single match or a single day.**

## 6. Top / Bottom Matches by GGR (Top 10 each)

### GGR by Match (USD) — Top 10 most profitable vs Bottom 10 worst

Each bar = the house win/loss on one match. **Green (right)** = house won, **Red (left)** = players won / house lost.

**Risk pattern:** the biggest-loss matches share one trait — **a favorite heavily backed by players that then wins** (France v Spain (07/15 03:00) 、 Spain v Cape Verde (06/16 00:00) 、 England v Norway (07/12 05:00)). **The knockout stage is all top-team clashes with even more concentrated betting**, so this "players backing the right favorite" tail risk will be significantly amplified.

## 7. Risk & Variance Assessment

| Risk                   | Description                                                                                                                              | Level    |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Provider concentration | Single provider SABA holds 92.0% of cumulative GGR ( $\geq 90\%$ , highly concentrated); a single-point failure is a platform-level risk | High     |
| IM consecutive losses  | Cumulative Margin -3.3% (negative) with 5 consecutive days of negative daily Margin — not single-day noise                               | Critical |

## 8. Cross-functional Action Items

### Trading / Risk

- Reduce **SABA single-point dependency**; build failover and settlement-delay alerts.
- **IM has consecutive losses** — check odds parameters, settlement and reconciliation for errors first; pause volume pushes.

## Glossary

| Term                     | Definition                                                                                               |
|--------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Turnover / Handle</b> | Total amount wagered by players (business volume, not revenue).                                          |
| <b>GGR</b>               | Gross Gaming Revenue = Turnover – payouts to players (the actual revenue).                               |
| <b>Margin</b>            | $GGR \div \text{Turnover}$ . For every 100 staked, how much the house keeps on average (win efficiency). |
| <b>Bet Count</b>         | Number of confirmed bets (ConfirmBet).                                                                   |
| <b>Provider</b>          | Sportsbook odds provider (e.g. SABA / BTI / SBO / Pinnacle / 9W / CMD / IM).                             |
| <b>Site / Brand</b>      | Operating brands under the N8X platform: Nova88 / Goal123 / Bwing.                                       |
| <b>pp</b>                | Percentage point — the absolute difference between two percentages.                                      |
| <b>Tail risk</b>         | Low-probability, high-impact events (e.g. favorites all winning, players piling on the right side).      |

## Data Notes & Methodology

- Source: 《2026 World Cup N8X Performance 0716》 snapshot.
- Platform totals are the sum of all providers (cross-checked against the file's Total column). A few cells containing Match-ID strings are auto-excluded and do not affect the amount totals.
- **Bet Users repeat across matches and cannot be summed into unique users**, so ARPU is not estimated; member-level metrics require a separate data pull.
- "Played" is defined as **single-match Total Turnover > US\$100 and settled** (unsettled early-market matches excluded); amounts in USD;  $\text{Margin} = GGR \div \text{Turnover}$ .
